

Pay for care and save money with a flexible spending account (FSA).

What kind of an FSA is right for you?

An FSA lets you set aside money to help pay for health and/or dependent care. You keep more of your money because you don't pay taxes on the money you put into your FSA. The amount you save depends on how much you put into your FSA and your income tax rate. There are 3 types of FSAs:

1 Health care FSA.

Use it for eligible health care expenses like medical, pharmacy, dental and vision services and supplies.

2 Dependent care FSA.

Use it for eligible dependent care expenses like day care and elder care services and programs.

3 Limited purpose FSA.

Use it for eligible dental and vision expenses if you're already enrolled in a health savings account (HSA).

How an FSA works.

You decide how much money you want to put into your FSA.

Not sure how much to put in your FSA? Use the FSA Savings Calculator on welcometouhc.com/fsa.

Money is taken from your paycheck—before taxes.

When the plan year begins, money is deducted from your paycheck before federal, state or Social Security taxes are taken out. The money is placed into your FSA.

You can use money in your FSA to pay for eligible expenses.

The entire amount of your health care FSA is available the first day of the plan year. You don't have to wait until the money is in the account. If you sign up for a dependent care FSA, money must be in your FSA to be able to use it.

CONTINUED

REMEMBER

You must sign up for an FSA each year.

The Mastercard® Health Care Spending Card.¹

Your FSA may come with a debit card, which makes it easy to pay for services from your FSA.

¹ May not be available to some members. Please see your FSA benefit documents.

FSA eligible expenses.

Health care FSA.

- Acupuncture
- Blood sugar test kits
- Breast pumps and lactation supplies
- Chiropractor visits
