

Oral Oncology Split Fill Drug List

Updated January 1, 2020

Oral oncology drugs are medications taken by mouth to treat various types of cancer and are an important part of many treatment plans. Unfortunately, some of these oral medications can cause side effects which may lead to having to change the strength of the medication or stop the medication entirely. It can take a few months to settle on the dose that works best for you. If a full month's supply of your oral cancer medication was dispensed before the right dose was found, this could be very expensive should you have to change or stop the medication soon after filling it. Our Oral Oncology Split Fill program can help prevent unnecessary costs. For the first 3 months of your treatment, you will receive 15 days of your prescription twice a month and will only pay half of your share of the cost each time. Then, after your third month of treatment, once the right dose has been established for you, you will begin to receive a 1-month supply for the rest of your therapy.

Below is the **Oral Oncology Split Fill Drug List** and can be used as a reference for medications which will be dispensed in 15-day supplies for the first 3 months of therapy. Some drugs listed may have additional requirements or limits depending on your plan. This list is provided for your reference and may not be all-inclusive.
